

# Auto Transport Checklist

QMM can make arrangements for vehicle shipping or the transportation of recreational vehicles. A detailed report on the condition of the vehicle (i.e., dents, scratches, rubs, paint condition, cracks, etc.) will be completed and signed by you and the driver before the vehicle is loaded.

QMM's third-party carriers have been carefully selected for their years of specialized experience in vehicle shipping, in enclosed rail-cars or state-of-the-art enclosed auto transporters

Before booking an auto shipment, you should document the following details so your move shipping coordinator can quote your auto shipment accurately.

## Preparing a vehicle for transport

- Deactivate your alarm system
- Remove all personal belongings.
- Wash the vehicle thoroughly for an accurate inspection.
- Make sure you're the gas tank is no more than a quarter full.
- Ensure the battery is secured with a mounting bracket.
- Remove accessory luggage racks, bike racks and ski racks.
- Remove all unsecured stereo accessories, car phones and garage door openers.
- Remove or retract all oversized antennas.
- Place all spare tire and car covers in the trunk.
- Secure or remove any loose parts, such as ground effects, spoilers and wide mirrors.
- Secure any tears or open seams on convertible tops to prevent further damage.
